

BASE DE DONNÉES, SITE INTERNET ET NAKALA, TRIO GAGNANT POUR LE PROJET DESERT NETWORKS

DESERT NETWORKS

Into the Eastern Desert of Egypt from the New Kingdom to the Roman period

Agnieszka Halczuk, Noémi Villars, Rencontres Huma-Num, 25 mai 2021

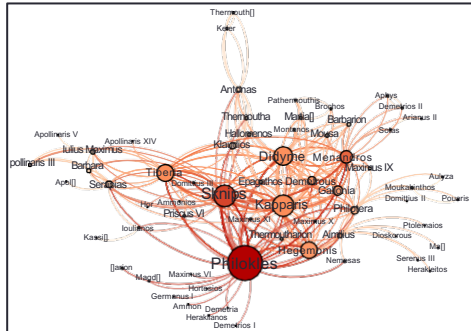

Deux objectifs principaux :

-réunir la documentation relative aux sites du désert Oriental occupés du Nouvel Empire (milieu II^e mil. av. J.-C.) à la fin du Haut Empire romain (fin du III^e s. ap. J.-C.).

-étudier les **réseaux** de la région qui ont permis aux personnes qui ont exploité, traversé ou ont vécu dans la région de survivre, dans un environnement fondamentalement hostile

Site internet du projet *Desert Networks*

Welcome to the website of the Desert Networks project

"Desert Networks" is a scientific research project funded by the [European Research Council](#) (ERC-2017-STG, Proposal number 759078) for five years (2017/11 to 2022/10). It is hosted by the [HiSoMA](#) research center at Lyon ([CNRS](#)), member of the [Maison de l'Orient et de la Méditerranée](#), with a dozen researchers and engineers directly involved in the project and many collaborations with other colleagues and institutions, starting with the [University of North Carolina at Chapel Hill](#).

The project focuses on the physical, economic and social networks that have linked the Egyptian Eastern Desert and have enabled people to survive in a hostile environment and to exploit its resources for almost two millennia, from the mid-second millennium BC until the late third-early fourth century AD (see [here](#) for a thorough presentation of the project and the team).

A gateway to the results of the project

This website is a gateway to accessing the results of the project, as the team's work advances, through different pages and tools. It includes:

- A gazetteer of the more than 250 archaeological sites and more than 200 watering places located in the Eastern desert, providing complete information on the sites, their remains, location, archaeological and textual finds, chronology, historiography, bibliography, images, with a search tool;
- A "Networks" page, dedicated to the presentation of the networks and geospatial models that have been reconstructed by the project's team;

<https://desertnetworks.huma-num.fr>

Dépôt des images sur L'ancienne version de Nakala

- Une possibilité de dépôt
- Saisie des métadonnées moyennement agréable si grosse quantité de données similaires
- Nécessité de renseigner certains champs, même si inconnus (date, auteur)
- Recherches parmi les images déjà en ligne compliquées ou impossibles
- Récupération des liens des images à partir des listes
